## Company Overview

Originally founded in 1975 as Air Tool Services cc, ATS 2000 (Pty) Ltd was registered in 2001 as a specialist design manufacturer of heavy-duty pneumatic equipment for all industrial sectors. ATS 2000 has headquarters in Johannesburg, South Africa. We are the locally preferred suppliers to a number of major players in the mining, manufacturing, construction and engineering sectors.

Our product range includes lifting and pulling equipment, beam clamps, beam trolleys, grinding and cutting equipment, pumps and fastening equipment. All the products adhere to stringent standards and certifications.

For decades we have remained at the forefront of technological advancement within our field and have refined our products and services with the undertaking that clients' needs are met – providing cost effectiveness, timeous delivery with uncompromising quality while ensuring optimal user safety.

Health and safety for the user of our products is of primary concern to our business. Our staff receives regular skills development training to ensure a high standard of manufacturing to meet stringent engineering and safety requirements.

Accreditations held:

- TUV Rheinland ISO 9001: 2015
- ASME B30-16 and SANS 1638 (RIGGA and INDU lifting range)

ATS 2000 has an ATEX EX classification on certain products (EC classification according to directive on hazardous locations 94/9/EEC) – spark proof designs for ATEX zones 1 & 2. This mainly applies to our lifting range, but some of our other ranges can be adapted to meet these requirements.

We are fully LME accredited and certified to dynamically stress test our lifting equipment up to a load rating of 200t.

---

## Vision – Making a Difference...

ATS 2000 prides itself as the leader in innovative designs and manufacture of cost effective and technologically advanced, heavy duty pneumatic equipment in all industrial sectors, both locally and internationally. The company has been focusing on the Oil and Gas sectors, providing services in solution design and maintenance of products, whilst serving their customers with integrity and providing quality products.

---

## BEE Status

We stand firmly by entrenched values to support the greater community in creating employment and skills development for our staff. Our company employs over 150 staff in 5 provinces and we are proud to be 26% Black owned and fully compliant, holding a Level 8 BEE accreditation.

---

## Products

Product Innovation & Development:

- 1976: 550 Pneumatic grinder range developed and manufactured - a first for SA with success in the heavy and structural engineering sectors
- 1980: Air-powered chainsaw, Air Grinder and Vortex sump pump developed for mining industry
- 1996: ATS 2000 acquired manufacturing rights from THM Air Hoists opening new opportunities for ATS 2000 and their clients. Manufactured Air Hoists ranging from 0,25t to 15t
- 2000: Received the SABS (South African Bureau of Standards) Engineering Design Award for our new ATS pneumatic chainsaw
- 2007: 1" G1 double diaphragm pump designed and manufactured
- 2008: ATS 2000 AWBM air wire rope winches introduced with pulling capacities from 0.5t – 3t

- 2009: RIGGA mining pneumatic hoist & trolley system developed for underground battery bays. Air powered overhead Monorail Hoist developed
- 2012: Rapid Rail cutting & drilling machine introduced as safer alternative to acetylene cutting of rails for time efficient precision cutting and drilling (This cold cutting machine was a world first)
- 2013: Lubrication-free Vortex sump pump introduced (World first for pneumatic vane motors and now applied to all products where applicable)
- 2013: Pioneers in the design and manufacture of 25t air hoist on the African continent. One of few international manufacturers producing high tonnage lifting capacity air hoists.
- 2015: Developed 30t Pneumatic BOP handling system. Diaphragm Pump range Opti-Flow valve introduced – larger capacities 2" and 3" pumps for different industry applications
- In February 2015 delivered our first subsea 2 x 25t ultra-low headroom hoists to the US Navy in Hawaii. Previously the maintenance work would be done within a dry dock, now with our subsea pneumatic hoists they are able to use a special off-shore rig to do the maintenance in situ, saving time and money.
- ATS 2000 also imports a full range of pneumatic tools including impact wrenches, grinders, drills, riveters, chipping hammers, rotary hammer drills, die grinders, and pavement breakers for the local SA market. These are sold under the ATS Blueline banner.

---

## Local Footprint and Global Reach

We are currently exporting our Vortex pump range and Turbo G4 Grinder series, ATS RIGGA & INDU air hoists and chainsaws to North & South America, Africa, Asia, Europe and Australia.

We have made significant inroads into the international export market, securing partnerships with the following distributors who market our products within those countries and surrounding markets:

USA ([www.elephantlifting.com](http://www.elephantlifting.com))

Australia ([www.dowdens.com.au](http://www.dowdens.com.au))

Singapore ([www.jordanns.com](http://www.jordanns.com))

Bahrain/Saudi ([www.emce.com](http://www.emce.com))

UK ([www.truflame.co.uk](http://www.truflame.co.uk))

Zimbabwe ([www.viking.co.zw](http://www.viking.co.zw))

Locally, we are preferred suppliers of our pneumatic equipment to:

- Anglo Platinum
- Anglo Gold Ashanti
- Impala Platinum
- Marula Platinum
- Gold Fields
- Harmony Gold
- Sibanye Gold
- Sibanye Stilwater
- Afrisam
- Afrox
- ArcelorMittal
- African Rainbow Minerals

and many other major players in the mining, construction, food processing, automotive and engineering industries.
